

# Packaging machines of the newest generation compact and efficient

## LV300 / LV500: Vertical Bagging Machines

Flexible and versatile machine.  
Applications range from tabletop instruments with manual feeding to fully automated systems.

e.g. hardware, fittings, plastic parts from moulding machine, etc.

Bag width: 25 - 150 / 250 mm  
Bag length: 40 - unlimited  
Performance : up to 30 bags per min

## LH350 / LH550: Horizontal Bagging Machines

Maybe the smallest machines of its kind !

Most suitable for :

- heavy parts
- parts with sensitive surface
- assortments of different parts

e.g. CD's & manuals; cutlery, salt; etc.  
Defined transport of parts into the bag.

Bag width: 25 - 150 / 250 mm  
Bag length: 40 - unlimited  
Performance: up to 25 bags per min

## LH150: Air Cushion Machine AIRPOP

This machine can bring your shipping department into pole-position.  
Produce your padding material on demand just-in-time!  
Very handy and easy to operate.

For PE- and laminated films !

Pad width: 75 mm  
Pad length: 40 - 990 mm  
Performance: up to 60 pads per min

## LH400: Air Cushion Machine AIRPOP XL

Flexible and powerful machine producing environment-friendly, clean and dustfree padding material.  
Large pads up to 400 mm width!

For PE- and laminated film (half tube) !

Pad width: 150 - 400 mm  
Pad length: 40 - 400 mm  
Performance: up to 25 pads per min

## Fully-automated Systems: Bowl-feeders - count by photo sensor

Interconnection of up to 32 automatic counting stations and/or manual workstations.

PC-controlled with easy-to-use assortment management software.

## Fully-automated Systems: Linear-feeders - count by weighing

Counting and Dosing Weigher for a weight range from 1-3000 g.  
Prepared for interconnection with a packing machine.

Powerful control unit with clear and simple user interface.  
System includes assortment management.

## Semi-automated Systems: Sorting-table / Assortment-table

Applications:  
- Sorting-Table with compartment conveyor  
- Assortment-Table with Check Weigher for weight range from 1 to 3000 g.

Prepared for interconnection with a packing machine.  
Powerful control unit with clear and simple user interface.  
System includes assortment management.
